## Projects

---

### Virtual Collab Studio

04/2025 – 04/2025

*Collaborative online coding and blogging platform.*

- Built using React, Vite, Bootstrap, Express.js, Node.js, MongoDB, and WebSockets.
- Enables real-time code collaboration and compilation in shared workspaces.
- Designed for collaborative coding, educational sharing, and community engagement.
- Integrated blog system for publishing, rating, and reviewing code snippets.
- Utilizes WebSocket APIs for seamless communication and instant updates.

### PayWise

10/2024 – 11/2024

*A modern expense tracking app to help you manage your finances effortlessly!*

- Built a Flutter app for tracking expenses and managing budgets.
- Integrated Firebase for authentication and Razorpay for premium features.
- Added features like transaction tracking, category management, and currency conversion.
- Designed a user-friendly interface with dynamic filters and real-time data updates.

### Taste Eat

04/2024 – 04/2024

*Online food ordering website.*

- Collaborated with a team to develop 'Taste Eat,' an online food ordering platform for university submission.
- Utilized a variety of technologies: HTML, CSS, JavaScript, Bootstrap 5 (frontend); PHP (backend); MySQL (database).
- Implemented core features such as food item management, filtering, and ordering.
- Integrated advanced functionalities including Google authentication, Razorpay payment gateway, and food delivery via Google Maps.

### Dream Holiday

11/2022 – 11/2022

*Online tour booking website.*

- Developed 'Dream Holiday,' an online tour booking platform, as part of a university submission.
- Utilized HTML, CSS, JavaScript, and Bootstrap 5 for the frontend; PHP for the backend; and MySQL for the database.
- Implemented key features such as tour creation, booking, user login and registration, reviews, and contact.
